### Editorial

#### ANDSF bravely defending national sovereignty, territorial integrity

Taliban insurgents have once again continued their bloodshed and violence against the Afghan people and security forces and attacked the capital of western Faraah province.

Eyewitnesses told media the militants launched attacks on the provincial capital from four directions. Heavy and light weapons fire could be heard in the city.

The militants spared no efforts to disturb the peaceful life of the Afghan masses and used civilians as their shields as well as their houses as their shelters while fighting the brave Afghan forces.

Such attacks showing that the country's enemies want to divide Afghanistan and bring disunity among the different segments of the society, but most of their vicious designs have been fortunately foiled by the heroes of security forces who have devoted their lives for defending the independence, national sovereignty, and territorial integrity of their beloved homeland.

The Afghan National Defense and Security Forces (ANDSF) could repulse the terrorists' attacks and killed and arrested hundreds of the insurgents, while trying their best not to harm civilians in the area.

In the past fifteen years, the Afghan National Defense and Security Forces (ANDSF) have developed into a collection of professional institutions that are both committed to their mission and highly respected. However, they still face major challenges in key areas of capacity, such as logistics, air power, and intelligence.

The heroic counter terrorism struggles of security and defense forces and cracking down the insurgents leave no place for any concern. In spite of complications of war in Afghanistan and open secret supports from terrorists in the region, the Afghan security forces have been passing a dangerous year but let not the enemies of the country to achieve their ominous goal in the country.

The bravery of Afghan forces is beyond doubt despite undergoing casualties. As per president Ghani's saying, Afghan forces are resilient in the face of adversity, and they have made constant improvements in efficiently and effectively coordinating and building systems of leadership and management.

Meanwhile for Afghanistan to enter the peace talks from a position of strength, it is necessary that ANDSF must be further strengthened. It is good that U.S. and NATO forces continue advising ANDSF, and Afghans should make use of this presence to a maximum extent and make the Afghan forces to be strengthened enough so that to suppress the enemies at anytime and anywhere in the country.

It is hoped that the precious lives and blood of our soldiers will not go in vain rather they will ensure peace and stability for the nation, if not now, in the future. Whenever negotiation is proved abortive, blood will be the only remedy to protect the rights and dignity of a nation.

Our selfless soldiers, who sacrifice their lives for protecting their nation and country, are not dead. They are alive in national memory and are considered national heroes since they play heroic role while defending their homeland and countrymen and women.

### Since establishment of Pakistan, Pashtun and Baluch tribes burning in unknown war

It is seen clearly that a movement is burning in Pakistan and criticized consistently from the policies of this country. Now, a great event is expected to be occurred in the Pashtun who form about 45 percent of 200 million population of this country, launched a protesting movement in the name of "Pashtun Protection Movement" that wants justice and further rights.

This movement is led by a young man in the name of Mansour Pashtun, and so far, held several demonstrating meetings in several great cities of Pakistan.

The movement wants liberal freedoms and contemporary values to be ruled by society. It is a very clearance of Pashtun areas from those who are at the moment want those who were arrested his cooperation in the past years by Pak Government and their destiny is unknown to the policies of this country.

#### Terror groups implement aliens' goals

Although ANDSF have been equipped and equipped by day by day and gain capability of discrimination people's worse enemies but suicide attacks and explosions are phenomena that have been causing fear and horror among our people time and again and victims innocent civilians.

On the quality of outside attacks in Islam, repeatedly has been emphasized by prestigious religious authorities inside and outside the country, as in recent meeting of Afghanistan, Pakistan and India social religious scholars outside attacks on civilians were called against Islamic rules and was said that terrorism should be attributed to no tribe, nation and religion, but as it has been seen, the terrorists and their supporters who apparently call themselves followers of Islam holy religion, neither attach any importance to reflect of Islam of these three countries nor avoid such attacks but passing on day increase and intensify their suicide attacks and explosions and trying to create atmosphere of fear and horror and advocate headlines of media falsehoods.

All these jobs hands and raised to separate and raise their voice against tyrants and despots of Pakistan military forces.

Despite their voices were covered by Pakistan press by resistance of military forces of this country, but despite this the protesters voices interlarded from the borders and received by world people.

The world people got awareness about tyrants suffered by these tribes from the address of tyrants.

In the course of history of this country, the governments of Pakistan were conflicting with freedom fighters movements in various kinds and organizations these movements and for their halting, the Pak governments on spare from any barbaric actions in the construction.

Thousands freedom voices of people live beyond Durand Line has become silent and remained unheard. Binda stated.

He said that demonstration in such system may be a good thing for a better tomorrow and would cause great changes in the region.

These voices are being millions oppressed people that should be heard by the UN and other international institutions who are claiming on the defense of human rights.

The government and people made youths of Pashtun and Baluch were forced with no known identity.

Rajon were taken place on such moments young girls and then they were murdered.

#### Terror groups implement aliens' goals

Under such circumstances our security bodies are required to undertake a military and security strategy to relax the situation and handle terrorism, because no doubt attention to this strategy beside other important and urgent issues could turn to normal current complicated and disturbing situation as a variant and create hopes to security in public opinion.
