

'Samanak' welcomes spring

Cooking of Samanak is part of Afghan tradition in preparation for New Year's celebration. This tradition is used in different parts of Afghanistan.

Samanak (one of women talking on the preparation of Samanak) said that wheat is cleaned and washed, then it is put in a tray, every day it is irrigated and protected in a cold place. Those who close to that place or touch it should always have a bath.

Because Samanak is very delicate and if a woman person touches it, wheat would be ruined. Talking on the occasion of Samanak, Nasim Gul stated that Samanak is cooked without oil and sugar. Samanak gets sweet from its roots and turns red due to its green color.

Nasim Gul went on to say, whenever Samanak grows well and matured, a number of women gather to take a clean wheat, put the matted

wheat on it. Each woman who has a son, takes a bath of green wheat and milk. Then she puts it on a wooden tray. If it was odd, it means that Allah will accept her prayer and other women pour other

green wheat on her head and make a pleasure. If it was even, it means that Allah would meet her requirement and desire. Then the women who took

three women to Samanak cooking ceremony. They cut Samanak to pieces and put it in a meat machine. Then put the ground wheat in a separate dish in water and separate it from Samanak.

Samanak is boiling and we stir it with spoons. The others are sleeping, we make our ladies room and Samanak is the offering of spring.

Samanak comes once a year. The girls are sitting around. One more year of good luck!

Some people add walnuts to Samanak pot. She explained, next morning, the older women open the cover of pot and pray. Women believe that eggs of enemy, moon and stars could be seen inside the pot. Then the distributors it to everybody including neighbors, relatives, and friends. Nasim Gul concluded. Karim Malik

Then the women who took wheat, invite friends and relatives women to Samanak cooking ceremony. They cut Samanak to pieces and put it in a meat machine. Then put the ground wheat in a separate dish in water and separate it from Samanak.

Lack of proper programs for poppy eradication in some provinces

The Ministry of Counter Narcotics (McN) authorities said that poppy eradication program has not properly implemented in some provinces which was successful in some others.

Addressing the media, Chief of Policy and Planning of the McN Mohammad Omani said that the common responsibility of Afghan government departments but law enforcement and drug control has submitted eradication responsibility of poppy fields personally to provincial governments.

Tracking different reasons why poppy eradication process has not implemented properly in some provinces, Omani said, in these provinces, in which the provincial leadership of poppy fields eradication process, the process has been properly implemented but in some other provinces there are insecurity and lack of coordination.

Prior to this, McN's Omani had said that poppy fields eradication process has been facing problem due to insecurity in current year and due to this reason the foreign donor organizations have also decreased their contribution.

At the same time Helmand province government and Kandahar province Hekmatullah Agha said, we have a provincial committee established with the aim of the details before poppy eradication process and they have to fight armed insurgents and drug simultaneously. Because

insecurity gave the way for poppy cultivation and drugs trade the way respectively. They said, we are fighting either insecurity or drug, not simultaneously. If we don't fight simultaneously both, we won't achieve security. Because arms and weapons are purchased and insurgent are paid

new growing system. Due to this reason poppy cultivation is more in Nurestan. But inhabitants of provinces in which poppy cultivation is more, are not satisfied with activities of their local counter-Narcotics authorities. They said that every year the government destroys pop-

py fields, the farmers will be disappointed. Therefore prior to poppy cultivation, public awareness and alternative livelihood should be given to farmers.

Results of a joint survey of Afghan government and McN OIC show that poppy cultivation was increasing in 2017. The McN has recently advised

farmers to use other crops, such as wheat, rice, corn, and other crops. The government destroyed poppy fields after cultivation while

foreign donors to set upon their commitments and enable them to properly implement alternative livelihood program. But the McN has not implemented the program aimed at preventing poppy cultivation and drug production, trafficking and usage.

According to these, if the government destroyed poppy

fields, the farmers will be disappointed. Therefore prior to poppy cultivation, public awareness and alternative livelihood should be given to farmers.

Results of a joint survey of Afghan government and McN OIC show that poppy cultivation was increasing in 2017. The McN has recently advised

Barbarism & demolishing of Buddha statues in Bamyan

17 years ago the Buddha statues were demolished by Taliban and this barbarism is repeating itself in Bamyan.

Organizing and performance of suicide attack in ceremony held for celebrating

are continuing till date in different forms and frames.

Formerly, with comprehensive of these design of our enemies, our knowledgeable people protect their cohesion and unity more than before against enemies and display it in practice.

With confirmation of destruction and demolishing, we are witnessing that in Afghanistan fight and confrontation between the two methods of thinking is continuing.

Thought of destruction of extremists that is a tool at the hand of enemies of Afghanistan and promote inhuman activities.

They are making effort to face with challenges, the thought of humane, civilized and contemporary that is in harmony with worthless acceptable worldwide.

The thought of destruction making effort through any possible means and ways to demolish infrastructure, the book of growth and cultural and scientific centers.

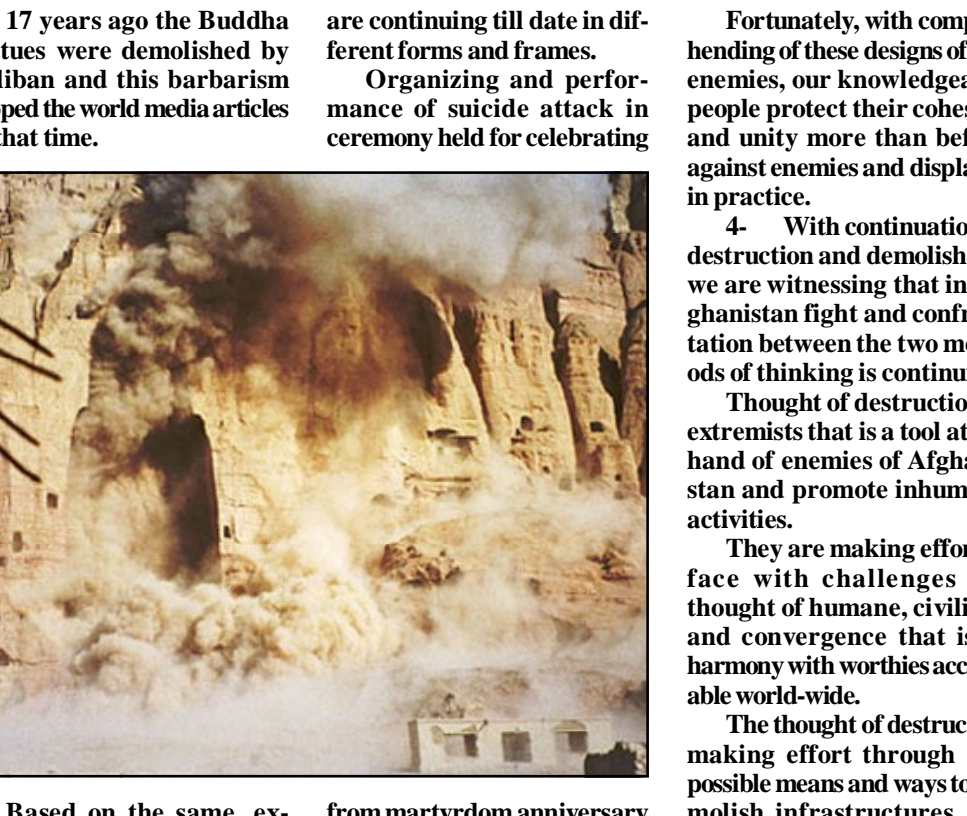

On the other, our well-aware people and young generations are moving with firm determination to make humane the social relations, expand economy and culture and institutionalize civilization and coexistence.

It is a matter of hope that the movement of giving warning is going ahead and in harmony with world civilization is facing with wrath and indignation of people more than before.

It is worth mentioning that in peace process of Afghanistan, reconciliation and agreement with destruction and barbarism is not considered but work is going on those Afghan who are ready to give violence and terrorism and in the framework of laws and regulations promote their civil, cultural and political activities.

As a result, the way would be paved for those who change their behavior and were known government and people is opened to accept them.

The Kabul Times

from martyrdom anniversary of martyr of national unity, that recently occurred in west part of Kabul is indicator of our claim that barbarism is continuing.

Attack on civil people, religious centers and scientific and civil gatherings that are held in legal and peaceful manner within recent few years and are sign of cultural development prove that extremist groups stand against them under any title.

This shows, extremists and terrorists common anti-Islamic and anti-human positions before human civilization.

As cultural and historical capital, destruction of Buddha statues in that day and demolishing of schools and cultural centers as well as attack on civilization is indicator of this fact that these groupings are look at the hand of foreign enemies and through any possible means act against our national interest and political growth. Then, they accept responsibility to create discord among people.

The root of attack and uncertain places come under attack is taken place by Daesh and some others by Taliban.

1. In the framework of Islamic jurisprudence and Sharia, there is no place for destruction of historical monuments. So, the latter which are indicator of culture and civilization of a country, are acceptable through petrified Islamic thought.

Destruction of historical monuments of Iraq and Syria in Mosul and Palmir cities by Daesh is nothing but reflection of barbarism that had behind ways of indignation in world level.

This measure of Taliban as a stigma on the forehead of their nerve and condemnation by Afghan and world history.

Destruction of Buddhas in March 11, 2001 is not the first but barbaric action of extremists but their barbarism, destruction and anti-civilization activities

has access to lack being and free fight as well.

He said, "I have been six years since I professionally started sports under supervision of Omani Jali."

He said I received the national team membership in 1987. I had passed two competitions in Olympic during which fortunately, I was first position twice and gained two gold medals," he added.

He added I also had challenging competitors, and gained good results.

"The gold and three bronze medals are among my sports achievements," he went on to say.

He said that a sport trip to India and found gold medal to my country.

He said I plan to gain good medals to my country through sports.

About his successes, he said successful people and those who try hard would never face failure.

Furthermore, he said a real champion should always remember two points, he/she should respect his/her coach and should take the medals before him.

At the end, he said youth should feel themselves responsible before the country and they should join hands to build the society.
