Food for thought
Hijab has direct link to morality of individuals in society.

Afghans want sanctions removed but, U.S. intensifying further

The last long imposed war, fueled by some alien circles which was nearly to affect the unity of different Afghan tribes, has now ended after the Islamic Emirate took control of the whole country.

This should also be noted that a firm security in the country which the Afghans did not witness over the last more than two decades is now restored.

Human rights, including that the women and girls are well respected, even better than the past and their work and education would be ensured in the near future, as the IEA's related organs announced to do it duly.

Inclusive system is now established within the caretaker government, and efforts are underway for more inclusiveness of the Islamic system.

Afghanistan has now a free corruption system, freedom of media and the law for media violation is maintained like before, which is highly welcomed by the media outlets.

All conditions for recognition of the Islamic Emirate are met and the international community has no excuse to officially recognize the Islamic system. And the U.S. has no reason for keeping sanctions continued.

Also, the recent move by the Biden administration, to have reportedly ordered the use of Afghanistan's frozen assets in funding aids or compensating 9/11 attacks' victims, has shocked the Afghans. This is illegal and illogical.

However, the decision had not been officially announced, some international media reported: "The order will require U.S. financial institutions to facilitate access to \$3.5 billion of assets for the Afghan relief and basic needs and the other \$3.5 billion would be used to fund ongoing litigation by U.S. victims of terrorism."

The U.S., instead of releasing the country's central bank's money or at least softening sanctions on the needy Afghans, has reportedly moved to order the use the money for its own under the pretext of the so-called 9/11 incident's victims' compensation.

This is injustice as if the attacks were carried out by any of anti-American dissident groups, then why the people of Afghanistan pay the price?

The Afghan assets should be all go to help the people of Afghanistan who are facing mounting economic hardship. This can help prevent brain drain and flee of the country's educated young generation.

On the other side, the aid organizations are collecting funds to assist millions of people in need, around the world and there is no need for releasing part of the frozen trust fund, to assist the Afghan people.

The 9/11 attacks and their victims, have nothing to do with the needy people of Afghanistan.

The United States spent up to 2 trillion U.S. dollar over the last 20 years in Afghanistan, and how justifiable is this to compensate the 9/11 incident's victims from the money of a poor nation?

The move, by Biden administration, would further deepen Afghanistan and its people into the quagmire of disaster and in fact, it is against all international values and a clear enmity with the people of Afghanistan.

Plundering Afghan assets US's utmost humiliation

After the United States of America (USA) has now been defeated, not it has desecrated to plundering and looting. It plundered the Afghan rightful assets and allocated to the victims of September 11. However, not a single Afghan is involved in the terrorist attacks of 9/11. In addition, the victims of 9/11 attacks can receive the blood compensation, who are entitled the Afghan victims of past twenty year retroflected war are given the compensation. Although they are the last of the Afghan assets, about \$3.5 billion, which given to the 9/11 victims and the remaining half will be distributed to Afghans through humanitarian aids, they do not expect who the other remaining half belongs to and why it is given to other people. This is the highest degree of US hypocrisy.

In fact, Afghans have sacrificed too much for their independence and in fighting the invaders. They know that the value of this independence is higher than the plundered assets. The Afghan nation is ready for any kind of sacrifices. It has even been ready to accept slavery if necessary.

The letter centers may have devised several other plans for the

to its lowest ground and indicate that the organization of United Nations is built just to deceive and betray the people.

However, this step will not only reflect the status of America but also the international community as well. It has become clear that American other values of the world have no value and regulations, but only their own benefits are valuable to them. The case of US is clear message to all oppressed nations to stand for their rights. We should not fight against the oppressors. It is our sacred right or your rights, maintain the way of indignity and struggle for peace and dignity.

Praise be to God, the recent step of America has become a source of unity in Afghan nation, a large number of Afghans raised voices for their rights and condemned that world decline of America.

For natural resources, Afghanistan is wealthy country. Afghans are also hardworking and sincere nation. The country is independent as well. Hence, Almighty Allah will soon give our nation independence, empowerment and strong economy rather than dependent, weak and fake one.

The Kabul Times

looting the assets is such a cowardly way can be the act of only someone who lacks a moral, honor and dignity. Plundering the Afghan assets is analogous as if someone loses in battle, and then when they cannot do anything else and watch something from their opponent and then leaves the battle as well.

Additionally, this plundering also shows that there are no human rights in the world, our say laws and regulations. Instead, it is like a world jungle, where each strong one preys on the weak one and the world is dominated by the wolves.

However, after looting the battle

Letter to the Editor,

Once more regarding the retired pensions,

Dear Sir,

The retired people especially those who have no other financial support and income resources are more vulnerable than anyone else and the IEA related organs should take it seriously.

I am an old retired man with an ailing family member who needs money for treatment.

Also, I have not yet received humanitarian assistances, while the international aids organizations and friendly countries poured tons of aids alongside cash into Afghanistan, particularly after the takeover of the country by the Mujahideen of the Islamic Emirate of Afghanistan six months ago.

You have to assist us by paying our pensions or show other alternatives to survive the ongoing critical economic situation.

Dear Sir,

We are desirous that the Ministry of Finance should be the best to allocate budget for paying the retired pensions

Respectfully,

A retired from the Ministry of Information and Culture
