

Violations against children in conflict ‘alarmingly high’: UN

Grave violations against children in conflict remain “alarmingly high”, with the coronavirus pandemic increasing their vulnerability to abuses, according to the UN. The report also notes that children and adolescents are at risk of sexual violence, including rape.

In a annual ‘Children and Armed Conflict’ (CAAC) report (PDF), released on Monday, the UN said at least 19,179 children affected by war in 2020 were victims of grave violations such as recruitment or rape.

The UN verified a total of 26,425 grave violations, of which 23,946 were committed in 2020 and 2,479 were committed earlier but verified only in 2020.

“Escalation of conflict, armed clashes and disregard for international humanitarian law and international human rights law have increased the risk of grave violations against children”, the report found.

According to the report, the highest number of grave violations were recorded in Afghanistan, the Democratic Republic of the Congo (DRC), Somalia, Syria and Yemen.

While more than 8,400 children were killed or harmed in ongoing wars, nearly 7,000 others were recruited to fight, mainly in the DRC, Somalia, Syria, and Myanmar.

Verified cases of abduction and sexual violence against children increased by 90 and 70 percent, respectively, in 2020, with abductions often coupled with the recruitment and use of children and adolescents in armed conflict.

The UN said the coronavirus pandemic “aggravated existing violations against children, including by hampering their access to education, health and social services, limiting child protection activities and drinking water access”.

Attacks on schools and hospitals were also prevalent in 2020, including serious attacks committed against girls’ education and against health facilities and their staff.

There was also an increase in the military use of schools and hospitals, especially with the brief respite of schools during COVID lockdowns – making them easy targets for military occupation and use, the report said.

“The war of adults have taken away the childhood of millions of boys and girls across in 2020”, Virginia Gamble, the Secretary-General’s Special Representative on CAAC, said.

“This is a completely devastating for them, but also for the entire communities they live in, and for the future of the world”, she added.

\$250 Million ADB loan to support Bangladesh social resilience program

The Asian Development Bank (ADB) today approved a \$250 million policy-based loan to help Bangladesh build resilience to help finance efforts aimed at improving the resilience and responsiveness of the country’s social development and resilience program.

Bangladesh has made remarkable progress in reducing poverty over the past decades. The poverty incidence declined from 48.5% in 2000 to 20.5% in 2019. However, while many people have lifted from extreme poverty, a considerable number continue to live at a subsistence level. The coronavirus disease (COVID-19) pandemic has significantly affected the socio-economic situation of Bangladesh with the decline in economic growth rate from 7.6% in 2019 to 1.2% in 2020.

“Enhancing social protection systems is critical to cushioning the effects of the pandemic,” and ADB Senior Social Sector Specialist for South Asia Hinaika Uthman said. “ADB supports the government’s intention to leverage the COVID-19 pandemic as an opportunity to strengthen its social protection program as an essential means of building the resilience of the poor and supporting an inclusive recovery.”

Other reforms include providing the use of mobile financial services and simplifying identification and documentation requirements for children – also known as the ‘one-stop’ service – and broadening the scope of social protection services to include life cycle social and health responses, including social insurance system. ADB will also provide a technical assistance grant to support program implementation, policy analysis, and capacity development for social development-related activities.

The technical assistance is estimated to cost \$1.2 million which will be financed on a grant basis by the Japan Fund for Poverty Reduction, relief.

Deadly traffic: the fuel drivers caught ...

In April 2019, when Baluch separatists killed 14 soldiers from Pakistan’s armed forces, Pakistan’s foreign minister accused them of abducting insurgents and asked to set.

Baluchistan and Iran’s province of Sistan and Baluchistan across the border are the poorest provinces in both countries, with majority ethnic Baluch populations.

Maryam Zia Baluch, a research analyst with the World Bank, said, “Transportation of fuel from Iran into Pakistan is the main source of livelihood for thousands of families. Closure of the Pakistan-Iran border would be deemed to families going hungry and without food on the table for days”.

Abul Rahim, 52, who also transports petrol, said, “If this business stops, we don’t know how we will survive. There are no

opportunities in this factory work or other construction work for us in Baluchistan. There is only Iran petrol for us.”

Rahim used to earn 40,000 rupees (1180) a trip. “In the past, I could make five trips easily in a month, but now it is hard to go once in a month,” he said.

The fuel carrier make food for themselves while sheltering as best they can from the IIC heat.

The fuel carrier make food for themselves while sheltering as best they can from the IIC heat. The village also spread petrol and Pakistan closed its borders with Iran. Thousands of border villages, Abul Rahim was one of them. “I tried to move to border villages, Abul Rahim was one of them. “I tried to move to border villages, Abul Rahim was one of them.”

“We were stranded at the border. They kept telling us to wait until they opened it, but they never did. When we ran out of food, we

had to break the chain and try to enter. The guards fired at us, four people were killed and more than 100 were injured.”

“No one came to take the injured to the hospital and there was no medical service, so they couldn’t tell their families about the attack,” Amnesty International said.

At a conference the violence, saying Iran’s Revolutionary Guards unlawfully used lethal force against unarmed fuel drivers and calling for independent investigation. The village also spread petrol and Pakistan closed its borders with Iran. Thousands of border villages, Abul Rahim was one of them. “I tried to move to border villages, Abul Rahim was one of them.”

South Korea probes possible hack of DSME computers

Korean officials confirmed that an investigation has been launched after South Korea shipbuilder Daewoo Shipbuilding & Marine Engineering Co. reported that it found evidence that hackers had attempted to breach the company’s computer systems. South Korea’s shipbuilder’s computer systems might have been again breached as there has been fresh speculation in South Korea of cyberattacks from North Korea.

There has been speculation in the past the DSME was one of the targets and last week DSME, the country’s largest shipbuilding company, reported that its email system had been taken down by hackers.

The current reports are merely of the same nature as the one in 2017 when the news was leaked that North Korean agents had hacked Daewoo’s computers and stolen blueprints to the nation’s submarines. The time, another expression of political hostility between the two nations.

According to the Yonhap news agency, the Ministry of Defense had discovered the attack reporting it to Daewoo. In that case, they reported they were almost certain that the cyberattacks had stolen sensitive materials about warships, including blueprints. The scale of the attack Daewoo reported was similar to other known efforts from North Korea.

Last week, HMM warned customers that its email systems had been attacked and were offline briefly. The company said it was able to recover its email in a matter of days. Customers were however being warned to use other forms of communication if they were having problems connecting local agents or to contact the home office. HMM said it believed that no sensitive data was accessed and that it had been able to limit the scope of the attack.

The company (DSME) reported this case to police, a similar 2017 when the news was leaked that North Korean agents had hacked Daewoo’s computers and stolen blueprints to the nation’s submarines. The time, another expression of political hostility between the two nations.
