

US heatwave: Wildfires rage in western states as temperatures soar

Wildfires are raging in the west of the United States as the region is hit by a heatwave that has brought record temperatures to several areas. Communities have been told to evacuate as firefighters struggle to battle the blazes in the scorching conditions. The firefighters in Nevada died when their aircraft crashed while attempting to battle the flames. Meteorologists say Las Vegas reached its all-time temperature high of 47.2C (117F) on Sunday. It came just weeks after another dangerous heatwave hit North America in which hundreds of people died from dehydration and heatstroke.

Haiti: Wife of assassinated President Jovenel Moise speaks out

The wife of assassinated Haitian President Jovenel Moise has spoken for the first time since her husband's death. She said she was in a state of shock and that she had not yet recovered from the trauma of the assassination. She also mentioned that she had received support from the Haitian government and the international community. She expressed her hope for a peaceful resolution to the crisis in Haiti.

US administers nearly 333.6 mln doses of COVID-19 vaccines: CDC

The US has administered more than 333.6 million doses of COVID-19 vaccines since the start of the vaccination campaign. The CDC reported that the number of doses administered has increased significantly, reflecting the progress of the vaccination effort. The report also noted that the majority of doses have been administered to individuals aged 18 and older.
